                                                                                                                                                        A transpson exists in the growth of this clone which has been deleted from the finished sequence. This transposon would insert after base 78210. Unsure bases exists between bases 165498 to 16550s. Un unresolved tradem repeat exists between bases 4000 to 6435. Polymorphisms have been identified between AC009427 and AC074117. Data from AC009427 was used to finish this clone,
                                                                  NEIGHBORING SEQUENCE INFORMATION:
Actual start of this clone is at base position 1 of RP11-413M20;
actual end is at base position 195880 of RP11-413M20.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     4780. .6423

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Sequence 1049, Application US/09016434

Patent No. 650038

GENERAL INFORMATION:
APPLICANT: Jeffrey J. Sellhamer

APPLICANT: Jeffrey J. Sellhamer

TITLE OF INVENTION: COMPOSITION FOR THE DETECTION OF SIGNALING

TITLE OF INVENTION: PATHWAY GENE EXPRESSION

NUMBER OF SEQUENCES:
ADDRESSEE: INCYTE PHARMACEUTICALS, INC.
STREET: 3174 PORTER DRIVE

CITY: PALO ALIFO

STATE: CALIFORNIA

COUNTRY: USA

Patent No. 6500938

GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Jainice Au-Young
APPLICANT: Jeffrey J. Seilhamer
TITLE OF INVENTION: FORMOSITION FOR THE DETECTION OF SIGNALING
TITLE OF INVENTION: PATHWAY GENE EXPRESSION
NUMBER OF SEQUENCES: 1490
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    DB 4; Length 2416;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Indels

CURRENT APPLICATION DATA:

APPLICATION NUMBER:

FILING DATE: May 28, 1996

CLASSIFICATION: 435

ATTONENY AGENT INFORMATION:

NAME: White, John P.

REGISTRATION NUMBER: 28,678

REFERENCE/DOCKET NUMBER: 0575/43771-A-PCT-US

TELEFRAMICATION INFORMATION:

TELEFRAM: (212) 278-0400

TELEFRAM: (212) 278-0400

TELEFRAM: (212) 391-0525

TELEFRAM: 422523 COOP UI

INFORMATION FOR SEQ ID NO: 1:

SEQUENCE CHARACTERESTICS:

LENGTH: 3720 base pairs

TYPE: MUCLAic acid

STRANDEDNES: double
OPERATING SYSTEM: PC-DOS/MS-DOS

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ద
